Projects

100 Days of SwiftUI [Swift, SwiftUI] GitHub This repository documents my journey of learning SwiftUI by building 19 projects over 100 days, following the 100 Days of SwiftUI challenge.	Verbie [Dart, Flutter, Firebase, GetX] Client's Project The all-in-one visual communication suite that grows with your child. Powered by AI, designed for families, and created by people that care.
Team_Task_Management-MobileApp [Flutter, Dart, ExpressJS, NodeJS, PostgreSQL, JWT] GitHub A mobile app for managing tasks solo or in teams. Built with Flutter and ExpressJS, with PostgreSQL.	Dllalna [Dart, Flutter, Supabase, GetX] Client's Project It's a real estate app where users can create accounts as buyers, sellers, or brokers. Users can buy properties, publish ads for their own properties, and even hire brokers through the platform.
AI Tutor [RAG, Langchain, LLM, Ollama, LLaMA 3.2, Vector Database, Pgvector, Embedding, Cosine Similarity, Python, Django] GitHub AI Tutor is a RAG system that answers user queries using semantic search over PDF documents and generates context-aware responses from a knowledge base.	Routivise [Dart, Flutter, Generative AI, Supabase, GetX] Client's Project It's a fitness app that keeps track of users' daily goals, exercises, and eating habits. Users can also get personalized suggestions from the built-in AI.
