## Projects

### 100 Days of SwiftUI

[Swift, SwiftUI]

This repository documents my journey of learning SwiftUI by building 19 projects over 100 days, following the 100 Days of SwiftUI challenge.

Verbie

[Dart, Flutter, Firebase, GetX]

The all-in-one visual communication suite that grows with your child. Powered by AI, designed for families, and created by people that care.

### Team\_Task\_Management-MobileApp

[Flutter, Dart, ExpressJS, NodeJS, PostgreSQL, JWT]

A mobile app for managing tasks solo or in teams. Built with Flutter and ExpressJS, with PostgreSQL.

Dllalna

[Dart, Flutter, Supabase, GetX]

It's a real estate app where users can create accounts as buyers, sellers, or brokers. Users can buy properties, publish ads for their own properties, and even hire brokers through the platform.

### AI Tutor

[RAG, Langchain, LLM, Ollama, LLaMA 3.2, Vector Database, Pgvector, Embedding, Cosine Similarity, Python, Django]

AI Tutor is a RAG system that answers user queries using semantic search over PDF documents and generates context-aware responses from a knowledge base.

Routivise

[Dart, Flutter, Generative AI, Supabase, GetX]

It's a fitness app that keeps track of users' daily goals, exercises, and eating habits. Users can also get personalized suggestions from the built-in AI.
